Next Dock Move!

Saturday, November 7th 8:30 am

Meet in the AYC Clubhouse for Coffee / Snacks

We are moving Dock 3 back to the AYC Point.

On July 19th 2009 with the lake at 639.29 MSL we moved Dock 3 out to the end of the AYC point. With the the lake back up to 647.00 MSL we will be moving Dock 3 back to the normal low-water position on the AYC point. Note that we typically move Dock 3 out of the harbor and to this low water position around 662 MSL. Once the lake is well above this level, I will schedule moving D3 back into the harbor.

Volunteers Needed: We'll need help to maneuver docks, shuttle crew and supplies, and pull cables. If you are able to help, please RSVP by sending an e-mail to fleet_commander@austinyachtclub.net, or call Christopher Dwight, Fleet Commander at 512-239-8500, or call the AYC office.

Bring Your VHF Radio: All crews will monitor VHF 78. If you have a hand-held radio, please bring it to listen for instructions and/or requests.

What to Bring: leather work gloves, sunscreen, hand-held VHF radio

Sincerely,
Christopher Dwight, AYC Fleet Commander 2009
